## Harima to Exhibit at "nano tech 2025"

**HARIMA CHEMICALS GROUP, INC.**

Harima will exhibit at International Nanotechnology Exhibition & Conference "**nano tech 2025**", held at the largest international exhibition center in Japan, Tokyo Big Sight, Jan 29~31.

Harima is currently conducting research on "Development of an Industrial-Scale Bioproduction System for Highly Bioavailable Carotenoids" in collaboration with Japan's "Research Institute of Innovative Technology for the Earth (RITE)". This is a subsidy project of Japan's "New Energy and Industrial Technology Development Organization (NEDO)", conducted under the program "Development of Production Technology for Bio-based Products to Accelerate the Realization of Carbon Recycling". This time, Harima will be exhibiting at NEDO's booth.
